EXPERIENCE

Software Engineer

[Embark Corporation](#)

Sep 2020 - Present

- Implement fully functional email WYSIWYG into Angular 8 applications to decrease tech debt and enhance user experience.
- Modified logic how user data gets rendered in the front end to decrease load times and increase browser efficiency by 60%.
- Collaborate with senior engineers to build reactive forms with custom cross field validations and auto-saving changes using JSON stored within MongoDB documents.

Software Engineer Technical Assistant

[App Academy](#)

Jan 2020 - Present

- Teach software engineering in JavaScript including language-specific intricacies, general coding best practices, and styling.
- Grade assessments and provide feedback on code style and best practices.
- Train coworkers and develop internal best practices.

Software Engineer (Contract)

[Asian Cinevision](#)

Feb 2020 - Oct 2020

- Designed and delivered a seamless film festival website by overseeing the transition to a front end using the Gatsby.js framework, accessing their WordPress database through REST API, and having all e-commerce features utilize Elevent's API.

Web Developer (Contract)

[Internal Creations](#)

Nov 2019 - Oct 2020

- Lead web developer for creation of *Internal Creations* website including upkeep and updates for any *Internal Creations* additions to the webpage.
- Implemented responsive web design for mobile.
- Integrated business social media feeds for easier accessibility to visitors.

Operations Coordinator

[GoldFarb Properties](#)

Jul 2017 - Jan 2019

- Managed a team of 17 employees across 6 commercial/ residential properties in Manhattan servicing 1100+ tenants with coordinating small repairs to full scale building projects.
- Organized outside contractors and tenants to resolve over 2000+ issues within their residence using Yardi ticketing system and BuildingLink with a 95% satisfaction rate.
- Oversaw the implementation and deployment of a delivery package system that serviced over 25,000+ packages yearly.

PROJECTS

OPENCOUNTER (Ruby on Rails, PostgreSQL, JavaScript, ReactJS, ReduxJS, CSS3, HTML5)

[live](#) | [github](#)

A full-stack web application inspired by OpenTable

- Utilized PostgreSQL and Ruby on Rails to implement BCrypt authentication, to reinforce data security across the application.
- Incorporated a customized search algorithm that displays a list of categories based upon the relevance of the search query.
- Implemented Restful API calls for efficient and secure data manipulation between Ruby on Rails and React.
