SKILLS

React, Redux, Ruby, Ruby on Rails, PostgreSQL, Javascript, jQuery, HTML5, CSS3, SQL, git, TDD, Photoshop, InDesign, Dreamweaver

PROJECTS

OPENCOUNTER (Ruby on Rails, PostgreSQL, JavaScript, ReactJS, ReduxJS, CSS3, HTML5)

[live](#) | [github](#)

A full-stack web application inspired by OpenTable

- Utilized PostgreSQL and Ruby on Rails to implement BCrypt authentication, to reinforce data security across the application
- Implemented a customized search algorithm that displays a list of categories based upon the relevance of the search query
- Created a visually pleasing web aesthetic to compliment the user experience on the web application using CSS and React to allow users to identify their necessities on the page

BIT MAXIMO! (JavaScript, Webpack, Canvas API, HTML5, CSS)

[live](#) | [github](#)

A dexterity-based infinite runner that tests hand-eye coordination

- Devised an obstacle generator that randomizes the shapes and color of the obstacle to test the player's reflexes.
- Developed a collision detection algorithm that takes into account multiple state and conditions of the user's input.
- Designed a clean legible design to express the intent of the project's aesthetics.

EXPERIENCE

Web Developer

Internal Creations

Sep 2013 - Present

- Pioneered the creation of *Internal Creations* website, including CSS and logo design using Photoshop, InDesign, Dreamweaver and HTML. [live link](#)
- Maintained the upkeep and updates for any *Internal Creations* additions to the webpage

Operations Coordinator

Goldfarb Properties

Jul 2017 - Jan 2018

- Managed a team of 17 employees across 6 commercial/ residential properties in Manhattan servicing 1100+ tenants with coordinating small repairs to full scale building projects.
- Organized outside contractors and tenants to resolve over 2000+ issues within their residence using Yardi ticketing system and BuildingLink with a 95% satisfaction rate.
- Oversaw the implementation and deployment of a delivery package system that serviced over 25,000+ packages yearly.

Technology Analyst

JPMorgan Chase & Co.

Jul 2011 - Nov 2012

- Supported testing of SQL procedures for a web application to meet domestic, international business requirements using SQL, XML, and Java
- Regression tested data validation after updates to ensure web application was functional
- Created a document repository on Sharepoint to ensure documentation was available for team members
- Gathered initial requirements for an international web application to create business requirement and functional specification documents

EDUCATION

Web Development - App Academy (Spring 2019)

Bachelor of Science in Information Management and Technology with a concentration in databases - Syracuse University 2011
